

Human Intelligence First: Building AI Literacy Together

How can we help children, families, educators, and communities understand artificial intelligence and use it responsibly?

In my article, “**NI + AI™ = Wisdom: How Doctor Vermeille Is Building an Ecosystem for AI-Literacy,**” available on Newsbreak, I introduce the educational mission behind Doctor Vermeille Global EdTech & Research LLC.

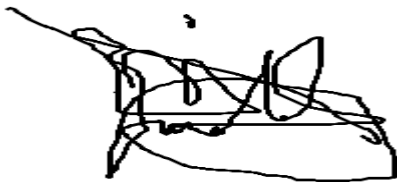

Our guiding principle is **NI + AI = 21st Century Wisdom™**—Natural Intelligence first, Artificial Intelligence second. In everyday language: **Your Brain Is the Boss™**. Our goal is to help people question AI outputs, verify information, and keep human judgment at the center of their decisions.

The article also recognizes **Build A Better Tomorrow**, the collaborating organization facilitating our **AI Lakay Nou radio show**. We appreciate its support in bringing AI education to our community.

We invite you to explore AILAKAYNOU.COM for learning materials, AI literacy resources, newsletters, and previous broadcasts. Share these resources with your family, school, organization, or community—and join us in learning how to use AI thoughtfully.

Building a better tomorrow begins with informed people, thoughtful choices, and shared responsibility.

A handwritten signature in black ink, appearing to read 'Doctor Vermeille', with a stylized flourish at the end.
